

Sarawak Daerah Mengundi 2026 SYOR 1

Polling District GeoJSON — Dataset Metadata

Preview: 1,141 polling district (Daerah Mengundi) boundaries under SYOR 1, colours for visual distinction only.

Dataset Metadata

Field	Value
Title	Sarawak Daerah Mengundi 2026 SYOR 1
Description	Polling district (Daerah Mengundi) boundaries underlying the Election Commission of Malaysia's 2026 "1st Proposal" (SYOR 1) redelineation for Sarawak — the finest-grained spatial layer in the series, nesting under both the proposed DUN and proposed Parliament boundaries.
Compiler / Publisher	TindakMalaysia Network Services PLT (civic data repository); primary source is the Election Commission of Malaysia (SPR)
Geographic Coverage	State of Sarawak, Malaysia
Bounding Box (WGS84)	109.538°E – 115.679°E, 0.854°N – 4.990°N (very slightly wider than the DUN/Parliament layers)
Coordinate Reference System	CRS84 (WGS 84, longitude/latitude); coordinates stored as XYZ, but Z is a constant 0.0 for every vertex — effectively 2D data
Geometry Type	MultiPolygon; 7 of 1,141 features are multi-part (up to 4 polygon parts)
Feature Count	1,141 polling district features
Vertex Count	~239,900 total vertices; ~210 per feature on average
Advisable Scale of Use	1 : 20,000 — digitized closely to streets, rivers, and other relevant physical/administrative boundaries; supports large-scale, close-in use, though still not a substitute for a formally surveyed cadastral boundary
File Format	GeoJSON (FeatureCollection), UTF-8
File Size	~11.3 MB
Process Stage	SYOR 1 — first-stage proposal, subject to public objection/inquiry before final gazettal
License	CC BY
Companion Datasets	The proposed DUN and Parliament GeoJSONs and CSVs (this layer nests under both via CDG_KODDUN / CDG_KODPAR)
Revision Note	This metadata reflects a corrected version of the source file in which duplicate CDG_KODDM codes were fixed; the file was re-fetched and re-verified after the fix.

Attribute (Properties) Dictionary

Property	Type	Description
NEGERI	String	State name; constant value SARAWAK.
CDG_KODDM	String (code)	Polling district code, format {parliament}/{dun}/{sequence}, e.g. 192/03/01. Unique across all 1,141 features as of this version (a prior version had 3 duplicate codes, since fixed at source).
CDG_NAMA_DM	String	Polling district name, e.g. SKIAT.
CDG_KODDUN	String (code)	Parent (proposed) DUN seat code, e.g. N.03. 99 distinct values.
CDG_NAMADUN	String	Parent (proposed) DUN seat name, e.g. SINGAI.
CDG_KODPAR	String (code)	Parent (proposed) parliamentary seat code, e.g. P.192. 31 distinct values.
CDG_NAMAPAR	String	Parent (proposed) parliamentary seat name, e.g. MAS GADING.
DAERAH	String	Administrative district (Malaysian local-government district), e.g. DAERAH BAU. 45 distinct values.
PBT	String	Local authority (Pihak Berkuasa Tempatan), e.g. MAJLIS DAERAH BAU. 29 distinct values.
STATUS_DM	String / null	Change-status flag comparing this polling district to Peta Asal (the original, pre-redelineation polling district map). Mostly null, meaning no change from Peta Asal (1,122 of 1,141); other values: NAMA BERUBAH (name changed vs. Peta Asal, 9), SEMPADAN BERUBAH (boundary changed vs. Peta Asal, 7), DAERAH MENGUNDI BARU (new polling district not present in Peta Asal, 2).
BERPINDAHSPR	String / null	The Election Commission's (SPR's) own classification of which polling districts it has moved (reassigned to a different DUN/Parliament seat). 'YA' = classified as moved (277 districts); blank and null both simply mean no change.
BILANGAN_P	Integer	Number of electors in this polling district. Sums to 2,037,648 across all features, matching the total from the proposed DUN layer and the pre-redelineation Parliament layer.
NOTA	String / null	Free-text notes, mostly null; explains renames or boundary shifts in Malay where present.
